

# DRONCO PREMIUM PROGRAMME

**2016/2017**

**CUTTING. GRINDING. SANDING. CLEANING. POLISHING.**

# innovation

made in germany

Dear customers,

We invite you to start a new chapter in surface finishing with us. The acquisition of DRONCO by the Jason Finishing Group, the logical merger of two market-leading companies in surface finishing, means there will be innumerable synergies for all involved - especially for you as our customer.

Products from the DRONCO and OSBORN brands complement each other perfectly: with our portfolio that extends from cutting to grinding, sanding, deburring, honing, satinising to polishing, we are the global provider of complete solutions for mechanical surface finishing. The management teams from DRONCO and OSBORN are now working flat out to coordinate business processes and sales structures - with the single aim of making access to our products even easier for you. Together, we want to prove to you that 180 years of experience, outstanding service, expert advice, innovative products, dedication and toil make us your first choice when you need experts for surface finishing.

I thank you for your trust in your partners OSBORN and DRONCO, and look forward to our continuing cooperation.

## Always part of the top team

DRONCO is one of the largest manufacturers for abrasives in Europe.

## High-performance manufacturer

Every day, approximately **200,000** cutting and grinding discs and **40,000** flap discs are being produced at the production site in Wunsiedel (Bavaria) - in the highest quality that is recognized worldwide.

## Innovative

Today DRONCO ranks to the most innovative and active global players in the abrasive business. Our guideline - every 90 days a new product.

The strategic adjustment and the outstanding innovation strength of our company were several times distinguished by independent, top-class jurors.

## Customer-oriented

For the fourteenth time in a row, DRONCO was awarded 1st and 2nd place respectively as "Commercial partner of specialized dealers."

## „Made in Germany“

Contrary to other manufacturers of the abrasive industry, DRONCO backs Germany as the manufacturing location. With highly-qualified employees and the latest advanced manufacturing technology in all areas we prove that a competition-oriented production is not only possible in Germany, but can be arranged particularly effective as well.

### TOP 100 - 2001

DRONCO was awarded for its impressive strategic reorientation and the resulting progression into a showcase company.

### TOP 100 - 2003

DRONCO was awarded for its outstanding power to innovate in conjunction with its achievements in research and development.

### TOP 100 - 2005

For process innovation

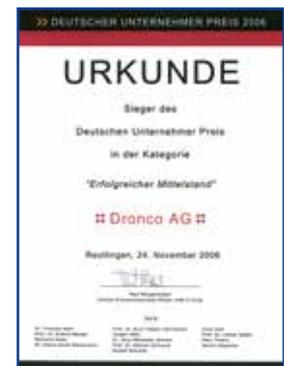

### 2002 + 2005 + 2006 + 2007

2008 + 2009 + 2010 + 2011 + 2013  
1st place as „Commercial partner of specialized dealers“

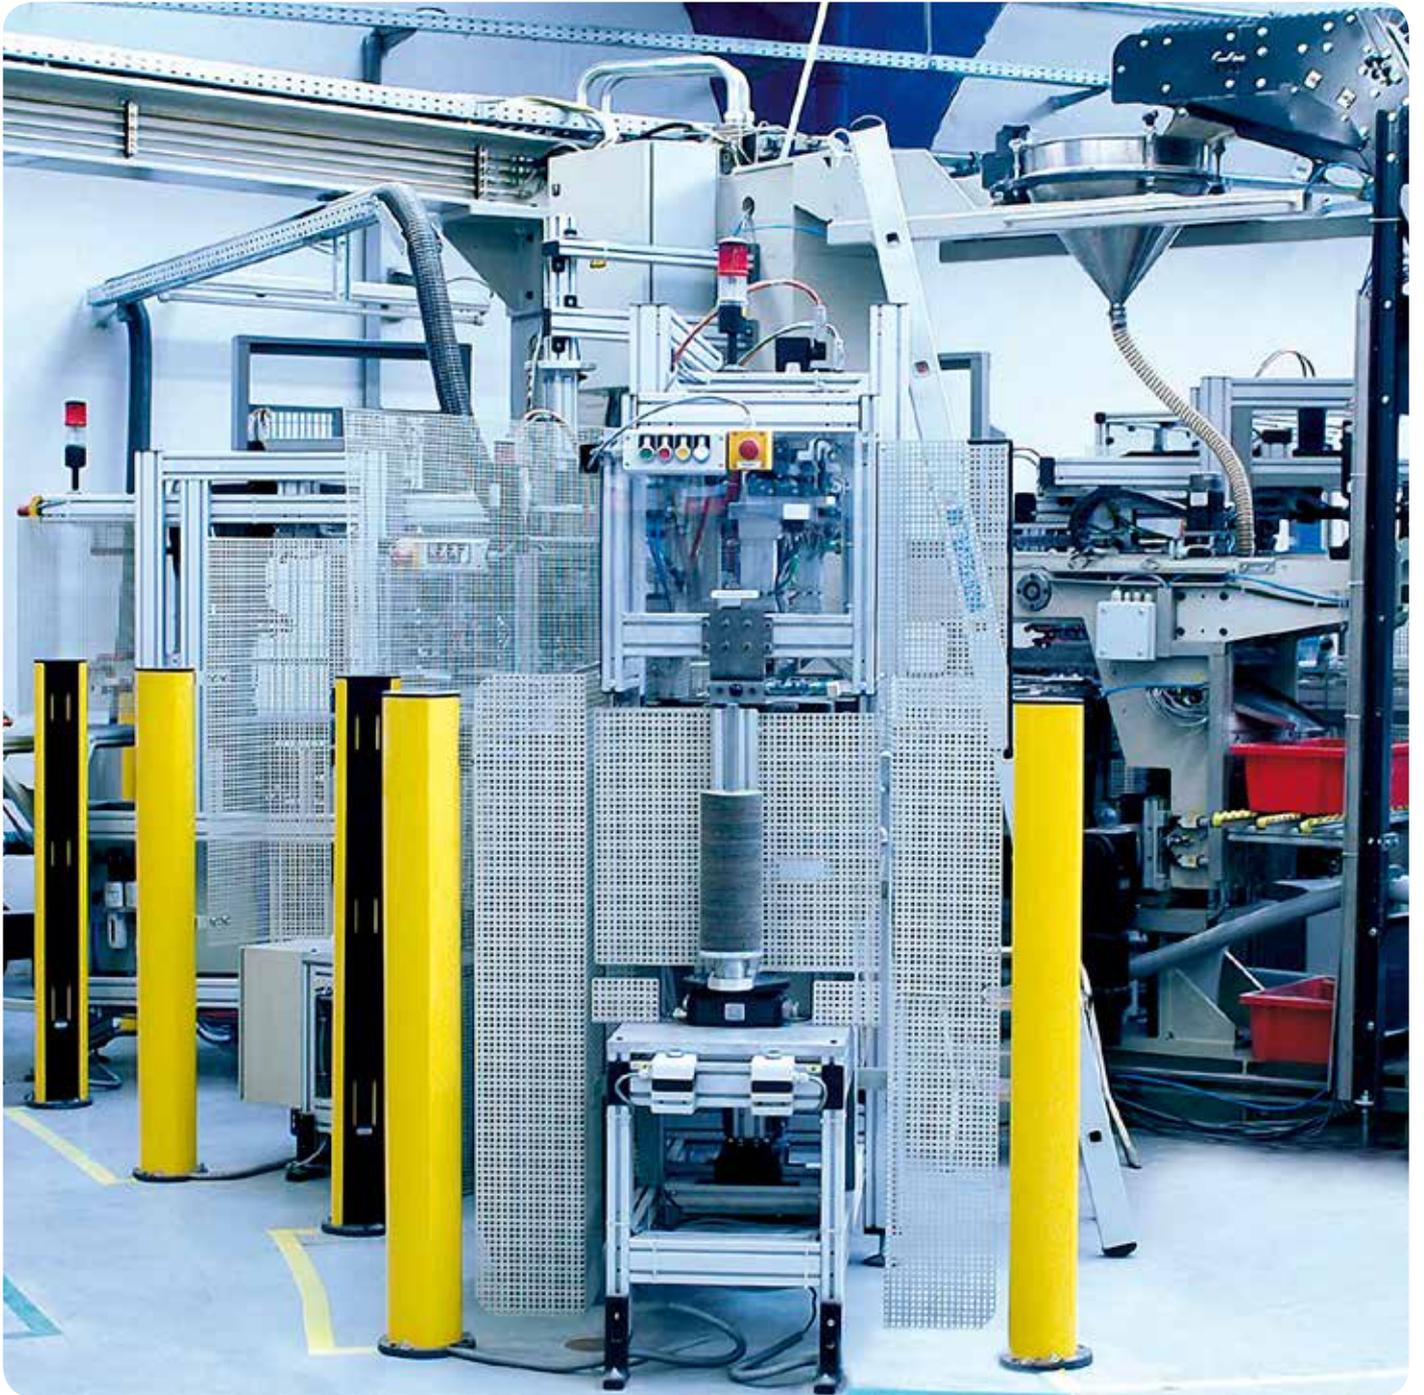

### 2003 + 2004 + 2012 + 2014

2nd place as „Commercial partner of specialized dealers“

### German Entrepreneur's

Prize 2006 in the field of „Successful Medium-sized Companies“

## Technology & Research

DRONCO sets standards for the future already today. Progress - Made in Germany is for us the perfect interaction of indicative technology and sustainable research and development.

## Technological quantum leap

Intelligent manufacturing technology of the latest generation, highly qualified employees and the unique DRONCO Production-System allows a flexible, rational and exact production, according to the highest quality standards here in Germany.

DRONCO has developed a pressing technology which ranks worldwide among the most advanced systems. With an almost complete renewal of our machinery we are one step closer to attain our ambitious target, to take over the technology leadership in our branch. With an investment of six million Euros we further extended and modernized our production site in Wunsiedel in 2015. Additionally we will invest in another two completely new high-tech presses in 2016.

Now DRONCO has the most advanced presses for cutting and grinding discs in Europe. This technology helps us to ensure the high quality of our products and to reduce emissions at the same time, making a sustainable contribution to preserving the environment.

## Research and Development

A great importance comes up to the development department of DRONCO.

Newly established laboratories with latest technical equipment fulfil all requirements for test-, chemical- and analytic procedures and applications.

Through intensive research and development in cooperation with leading universities, our own R&D department constantly develops new innovations and optimizes our products with regard to service life, cutting ability, precision and field of application.

The results are diverse pending patents and the market launch of several world innovations in the field of groundbreaking cutting and grinding technologies.

## **Safety first**

As a member of oSa, we go to any lengths to keep our abrasive tools as safe as possible

## Product safety

Cutting and grinding require a very high circumferential speed of the rotating tool in many areas of application. Therefore, our products are specifically designed to safely withstand the extreme mechanical and thermal stresses and strains. All DRONCO products correspond to current standards and the regulations of the trade association. Our quality management system ensures that we meet the high demands of a modern, worldwide acting industrial enterprise on each level. Certification in accordance to DIN EN ISO 9001:2008 is therefore just as natural as our membership with oSa.

### What does oSa stand for?

Before the year 2000, there were no binding safety regulations for grinding tools worldwide. Therefore, responsible manufacturers for abrasives from several European countries have then established the Organization for the Safety of Abrasives (oSa).

## DRONCO is member of oSa

We voluntarily committed ourselves to manufacture and sell safe and accident-preventing quality abrasive tools. Thus, we set an example against inferior and dangerous products.

The oSa emblem on the products indicates increased application safety for the user and decreased liability risk as well as outstanding brand image for manufacturers and retailers.

Our products correspond to the standards:

- EN 12413**  
Cutting and grinding discs
- EN 13743**  
Flap discs
- EN 13236**  
Diamond tools
- E DIN ISO 13942, 603-16, 6103, 15635**  
Measurements, tolerance and imbalance

## **Selling worldwide**

DRONCO products are in use in more than 100 countries in the world.

## Modern logistics

Our high standards to manufacturing continue also at the field of logistics. The automated store keeping provides a complete delivery of our products in time - to satisfy our customers.

Our new logistics center, close-by to the production, has been opened in 2008.

4,000 sqm storage space

950 sqm office space

2500 sqm traffic area

1400 sqm space for packing

as well as an high rack storage area with space for

9,200 pallets and

4,800 ground- level shelves.

## Win on points

DRONCO - a strong brand.  
Our extensive support promotes  
your turnover!

DRONCO Wire Presentation for tins: ①  
Our bestseller: The 1mm special disc for steel  
and stainless steel in a 10-pack tin. Simply  
hang in the support between the modules or in  
a rear panel (suitable adapter supplied) and  
watch your sales take off!  
Dimensions: 15 x 135 x 16 cm

## Training of your sales staff

Confidence in the sales talk with the end user generates a rise in turnover. Your sales personnel will receive professional knowledge in an entertaining and interesting training course which contains theory and practice.

## Promotion van

We support the specialized trade with promotion vans, which are constantly in use on in-house fairs, on open days, or locally together with the specialized trade and the end user.

## Attractive design

We present ourselves on the market visually clear and well planned. This includes packaging as well as contents. An effectively arranged colour guideline system leads easily and surely through the product assortment.

## Innovative products

As a DRONCO dealer you will profit from our extensive manufacturer's authority. With perfect product quality, highest safety standards and constant innovation we are setting standards on the market.

## Excellent sales promotion

Our sales promotion is coordinated constantly to the needs of the trade. Attention-strong sales assistance at the POS and the newly arranged product shelf is lastingly supporting your sales. Dealer promotion activities taking place several times during the year are providing additional turnover.

## Being in the media

DRONCO regularly places colour advertisements in technical and specialized magazines, and provides PR articles in order to sensitize the end user on the premium brand - excellent measures for an excellent product range!

- 2 DRONCO Tin Display 3x Combination: Freecut - Evolution 1mm - Cut+Grind Innovative products, well-explained and attractively presented. Dimensions: 43 x 32 x 29 cm
- 4 DRONCO Sales Display for Polishing Flap Discs : Many customers say „grinding“ but really mean „derusting and polishing“. Show them that you are the expert! Dimensions: 42 x 34 x 28 cm

- 3 DRONCO Sales Display with "Evolution RACE MAXX" diamond discs. Impressively presented with a short explanation on the head sign. Dimensions: 23 x 45 x 26 cm
- 5 DRONCO Triangle Display: Can be stocked individually with new or standard products. Dimensions: 28 x 175 cm

## Attention guaranteed

Professionals set the standard - also with the presentation at the POINT OF SALE

## Excellent sales promotion - additional turnover

Our elaborate concept provides for a premium sales promotion and increases your image as a top-quality supplier. Intelligent goods presentation and eye-catching sales assistance is lastingly supporting your sales. The DRONCO product shelf offers you an abundance of options to present your premium assortment of goods in a clear and attractive way.

## Exclusive service for our dealers

The labeling of the product shelves as well as the supply lists are exactly adjusted to your demands.

Colour control systems facilitate orientation

### Modular display assembly in different dimensions

individual modules that fit into common systems with widths of 1.0 and 1.25 m

## Modular accessories

## Product lines

Three product lines offer the right disc for every user and every application.

## DRONCO Express® - thin, precise, fast!

Powerful products in extra-thin material

- ▶ considerably faster
- ▶ exact cutting
- ▶ no chipping on the edges
- ▶ effortless performance

## DRONCO protect - good for your health!

Innovative products that protect the user with their special features:

- ▶ less noise
- ▶ less vibration
- ▶ less dust

## DRONCO FreeCut - extremely safe!

The brand new innovation: our conical disc (patent pending) for more safety and precision in use

- ▶ no pinching in the cut
- ▶ reduced danger of 'kick-back' effect (setback of the angle grinder)
- ▶ no lateral friction

## DRONCO Cut+Grind - ingeniously versatile!

The clever combination of two functions:

- ▶ cutting and grinding with one disc
- ▶ no change of disc necessary
- ▶ fast cutting with high removal rate

## Particular product features

Beside the specific cutting and grinding performance many of our products have an additional benefit for the user.

## Some general information

The following information gives you the best possible overview about the features of our products.

### 1 Description

Compiled for cutting discs as follows:

**A/AS** – aluminium oxide is the abrasive grain for cutting metal.

**AZ** – zirconium corundum is the abrasive grain for better life time and cutting efficiency.

**46** – indicates the grit size. The higher the number, the finer the grit. E.g.: 24 rough | 30 medium | 36 fine ...

**R** – the second letter indicates the hardness of the disc. The further into the alphabet, the harder the disc.

**BF** – resin bonded, fibre- reinforced

### 2 Product lines

perfect | evolution | special

Explanation see next page.

### 3 Blue background

Is the colour guideline for metal cutting discs.

### 4 Safety standards

Our products comply with the highest safety standards and regulations:

EN 12413 - cutting and grinding wheels

oSA - organisation for the safety of abrasives.

### 5 Measurements

Consist of (diameter of the disc)

x (thickness of the disc)

x (bore size).

Measurements given in mm and inch.

### 6 Expiry date

This quality cutting disc can be used without any restrictions until the indicated date.

(V month/year)

### 7 Max. rpm.

Indicates the permitted maximum speed.

### 8 FE/S/Cl ≤ 0,1%

Free from iron, sulphur and chlorine.

Special disc for cutting stainless steel.

### 9 Security information

Security information: For your own safety.

Please follow!

### 10 Red bar

Indicates 80 m/s as permitted peripheral speed.

**Green bar**

Indicates 100 m/s as permitted peripheral speed.

### 11 Made in Germany

Stands for proven quality - most of our products are manufactured and tested in Germany.

### 12 www.dronco.com

24 hr service on our website - we are always there when you need us!

## Product lines

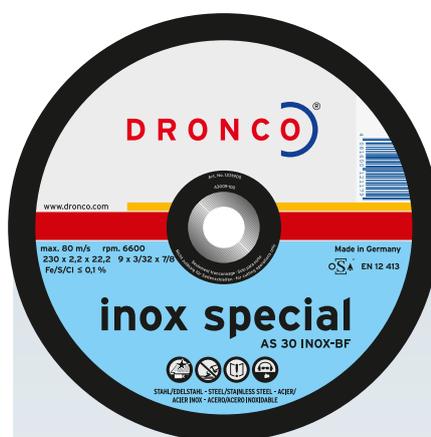

For craftsmen or industrial use - three precisely co-ordinated product lines offer the right cutting disc for every user and every application. All discs comply with the relevant regulations, have a high specific cutting capacity and guarantee a maximum of safety.

### perfect line

The best-seller with an excellent price/performance ratio. It has proven itself a million times in the hands of craftsmen and semi-professionals.

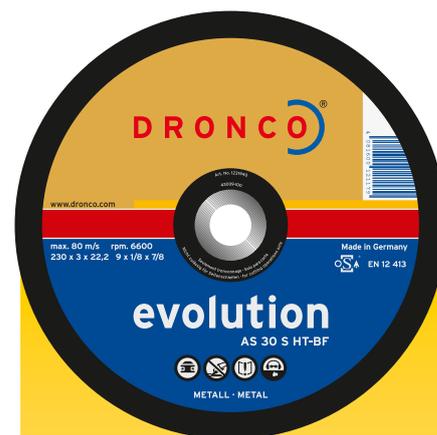

- manufactured according to EN 12413
- complies to oSa regulations

### special line

The special line for craftsmen and industrial applications. Due to the fact that different materials impose different demands, DRONCO produces discs especially matching the respective material. Special types of corundum and bonds are combined to suit the task in hand. This optimises performance, extends service life, increases efficiency and reduces cutting time.

- manufactured according to EN 12413
- complies to oSa regulations

### evolution line

Designed by experts and made of top quality raw materials, these all-round cutting discs combine outstanding service life with high cutting speed.

- manufactured according to EN 12413
- complies to oSa regulations

LIFETIME-PLUS TIN

Over 30% more service-life\*:

With the new Lifetime-Plus concept, we have given the Power Pack tin an amazing new function. Lifetime-Plus seals in the full performance of the discs and keeps it there until the pack is opened for the first time. So these "fresh from the oven" discs ensure to put all their power onto the machine.

Lifetime-Plus

- over 30% \* more service life (number of cuts)
- stops the natural ageing process of synthetic resin-bonded discs
- keeps cutting discs fresh until the pack is opened for the first time

115 x 1,0 x 22,23	4 1/2 x 1/25 x 7/8	13280	1 TIN á 10	=====	6900850	701203

125 x 1,0 x 22,23	5 x 1/25 x 7/8	12200	1 TIN á 25	=====	6900871	701418

\* compared to a standard 1mm cutting disc, stored for 6 weeks and subject to a natural ageing process which results in reduction of service life.

## Lifetime-Plus

- ▶ over 30%\* more service life (number of cuts)
- ▶ stops the natural ageing process of synthetic resin-bonded discs
- ▶ keeps cutting discs fresh until the pack is opened for the first time

### Why

## Lifetime-Plus?

A standard 1mm cutting disc undergoes a natural ageing process during storage due to the absorption of moisture from the air. After just 6 weeks, the tool life can have fallen by an average of approx. 30%.

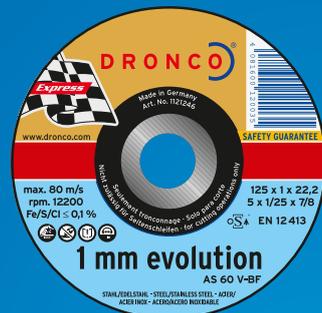

The ingenious Lifetime-Plus freshness seal stops this process before it even starts. Prepare to be amazed at the outstanding life of cutting discs from a freshly opened Lifetime-Plus pack.

## AS 60 V 1 mm

## evolution express

## Free hand

Clearly faster – clearly more precise – clearly better:  
Top class 1mm cutting disc in best quality.  
For precision cutting accurate to the millimetre and extremely fast cutting with minimum power consumption. No burring, no blue thermal discolouration. Outstanding optimized service life. True performance for your money.

Thin sheet metal, steel ropes, thin-walled profiles and tubes made of stainless steel and non-ferrous metals, composite materials.

- ▶ outstanding service life
- ▶ outstanding cutting speed
- ▶ lowest power consumption
- ▶ precision cutting accurate to the millimetre
- ▶ low-burr or burr-free edges

### Top of the class in speed and tool life

With our extra-thin, high-speed discs you will cross the finishing line in record time. Yet at the same time you can work in extreme comfort, with absolute safety and the highest level of precision – because you are using the best discs from the DRONCO racing stable.

## LIFETIME-PLUS TIN

Over 30% more service life\*:  
With the new Lifetime-Plus concept, we have given the Power Pack tin an amazing new function. Lifetime-Plus seals in the full performance of the discs and keeps it there until the pack is opened for the first time. So these “fresh from the oven” discs ensure to put all their power onto the machine.

### Lifetime-Plus

- over 30% \* more service life (number of cuts)
- stops the natural ageing process of synthetic resin-bonded discs
- keeps cutting discs fresh until the pack is opened for the first time

115 x 1,0 x 22,23	4 1/2 x 1/25 x 7/8	13280	1 TIN à 10	—	6900851	701210

125 x 1,0 x 22,23	5 x 1/25 x 7/8	12200	1 TIN á 25	—	6900873	701432

\* compared to a standard 1mm cutting disc, stored for 6 weeks and subject to a natural ageing process which results in reduction of tool life.

## AS 60 W HT Jubilee

## evolution

## Free hand

The bond of this high performance cutting disc was developed in the laboratory of DRONCO with the aim of an especially cool cut and was completed just in time for our 50th anniversary. In combination with a ceramic coated grain of the latest generation, a new high end tool was born: The 1 mm cutting disc Evolution AS 60 W HT Jubilee.

State of the art. The benefits of this top product:

- ▶ outstanding lifetime
- ▶ excellent cutting speed
- ▶ cool cuts
- ▶ low burr edges

Internal tests showed a lifetime extension of 17% in comparison to even our Evolution AS 60 V. Especially produced to ensure the greatest number of fast and precise cuts with minimum power consumption.

For thin sheets, steel ropes, thin-walled profiles and pipes made of steel or stainless steel.

### Lifetime-Plus

- over 30% \* more service-life (number of cuts)
- stops the natural ageing process of synthetic resin-bonded discs
- keeps cutting discs fresh until the pack is opened for the first time

# CERAMAXX

## OUR STRONGEST DISCS!

WITH CERAMIC GRAIN OF THE LATEST GENERATION GIVING AN ULTIMATELY INCREASED PERFORMANCE

- UNRIVALLED SPEED
- + UNBEATEN AGGRESSION
- + ULTRA LONG LIFETIME
- + MINIMAL ENERGY INPUT
- = HIGHEST EFFICIENCY

The new bonding technology and the micro-crystalline structure of the ceramic grain ensure a targeted release of new extremely sharp cutting edges. This guarantees the permanent availability of maximum performance of the CeraMaxx cutting and grinding discs - from start to finish. For a maximized cutting speed, removal rate and lifetime.

## The sharpest - the best!

DRONCO CeraMaxx discs are among the fastest, most aggressive and most durable on the market, optimizing the work process, saving down time and labour costs giving greatly increased productivity and efficiency.

CeraMaxx cutting discs with ceramic grain of the latest generation

- ▶ Excellent cutting speed = high productivity
- ▶ Lowest energy input = sparing man and machine
- ▶ Clean, burr-free cut = less rework
- ▶ Cool cutting without thermal blueing = less rework
- ▶ Excellent lifetime = reduced disc consumption

## AK 60 V CERAMAXX

### evolution

★★★★

The thin CeraMaxx cutting discs cut ultra fast with little effort massively reducing the energy input. The full cutting performance is therefore achieved at low pressure. For precision cutting accurate to the millimetre and with burr-free edges. Ideal for users from pipeline engineering and construction, shipyards, metal engineering, foundries, commercial vehicle construction, steel construction, plant engineering, crane construction, construction machine production.

The advantages of the CeraMaxx cutting discs prove especially effective in strong profiles and full material. For steel and stainless steel. Fe/S/Cl ≤ 0,1 %

## Free hand cutting discs stainless steel/steel

AS 46 / AS 60 T INOX FreeCut

special

Free hand

★★★★☆

FreeCut: The Conical Disc. This disc developed by DRONCO (patent pending) is a revolution in its field. The conical form of the disc tapers from the outer edge to the inner edge and gives the disc ideal cutting qualities. No braking effect caused by side friction, no jamming of the disc in the work piece (thus avoiding the dangerous kick-back effect). The cutting only takes place on the face side. The disc is easy to work with: pleasant, quick and safe cutting, good cutting control, no jamming.

For cutting steel and stainless steel, also suitable for non-ferrous metals. Does not contain iron, sulphur or chlorine (each 0.1%). Suitable for thin- and thick-walled profiles and solid material.

### Greater safety and precision during use.

- does not jam during cutting
- reduces the dangerous „kick-back“ effect
- less heat generated
- reduced side friction for unhindered cutting
- light, power-saving handling using the FreeCut principle
- less reduction of r.p.m. in the machine – and therefore faster cutting

The cutting disc tapers towards the center

AS 46 / AS 30 T INOX CUT+GRIND special

Free hand

★★★★☆

Cut+Grind: The first cutting disc you are also allowed to use for grinding. The Cut+Grind cuts at a comfortable speed with a thickness of 2.5 mm or 3.5 mm, you can immediately deburr and grind without changing the disc. That saves setup time and therefore money! Good removal rate for light grinding tasks. Of course, the disc complies with the prescribed lateral load for grinding discs of 290 N.

Suitable for normal and stainless steel, both for solid material as well as for profiles. Cutting and grinding in one step.

Deburr or grind immediately without changing the disc.

The first thin cutting disc you are also allowed to use for side grinding

- cutting and light grinding work in one step
- good cutting speed
- good removal rate
- no time-consuming disc changes required
- no need to purchase different discs
- for steel or stainless steel

## PLEASE NOTE

Cutting discs for use with stationary machines - from a swing cutting machine right up to a fully automatic machine with a control console and a closed working area. When choosing cutting discs for a stationary machines, please observe the maximum peripheral speed of 80 m/s or 100 m/s as recommended by the manufacturer. DRONCO also supplies discs for so-called "chop saws". These are swing-cutting machines with a driving power up to 2.4 kW/3 HP. Stationary cutting discs must never be used on free-hand machines!

## Some general information

The following general information gives you the best possible overview about the features of our products.

### 1 Description

Compiled for cutting discs as follows:

**C/CS** – silicone carbide is the abrasive grain for cutting stone.

**24** – indicates the grit size. The higher the number, the finer the grit. E.g.: 24 rough | 30 medium hard | 36 hard.

**R** – the second letter indicates the hardness of the disc. The further into the alphabet, the harder the disc.

**BF** – resin bonded, fibre- reinforced

### 2 Product lines

perfect | evolution | special  
Explanation see next page.

### 3 Green background

Is the colour guideline for stone cutting discs.

### 4 Safety standards

Our products comply with the highest safety standards and regulations:

EN 12413 - cutting and grinding wheels

oSA - organisation for the safety of abrasives.

### 5 Measurements

Consist of (diameter of the disc)

x (thickness of the disc)

x (bore size).

Measurements given in mm and inch.

### 6 Expiry date

This quality cutting disc can be used without any restrictions until the indicated date.  
(V month/year)

### 7 Max. rpm.

Indicates the permitted maximum speed.

### 8 FE/S/Cl ≤ 0,1%

Free from iron, sulphur and chlorine.  
Special disc for cutting stainless steel.

### 9 Security information

Security information: For your own safety.  
Please follow!

### 10 Red bar

Indicates 80 m/s as permitted peripheral speed.

#### Green bar

Indicates 100 m/s as permitted peripheral speed.

### 11 Made in Germany

Stands for proven quality - most of our products are manufactured and tested in Germany.

## DRONCO Express®: Definitely Faster!

### The asset in speed

- ▶ much higher cutting speed
- ▶ definitely faster cutting

### The asset in precision

- ▶ excellent clean cut
- ▶ edges low in burrs and free of chipping
- ▶ minimum loss of material

### The asset in comfort

- ▶ lowest possible force input
- ▶ at equal contact pressure
- ▶ a minimum of noise
- ▶ low in vibration
- ▶ little development of dust

C 24 R

perfect

Free hand

★★★★

Good service life and fast cutting at a reasonable price. The craftsman's disc that has proved itself in millions of cutting operations.

All types of material found on the construction site, such as concrete, stone, roof tiles, sand-lime stone.

## Some general information

The following information gives you the best possible overview about the features of our products.

### 1 Description

Compiled for grinding discs as follows:

**A/CS** – aluminium oxide/silicone carbide is the abrasive grain for grinding metal/stone.

**AZ** – zirconium corundum is the abrasive grit for better life time and grinding efficiency.

**30** – indicates the grit size. The higher the number, the finer the grit.

E.g.: 24 rough | 30 medium | 36 fine ...

**S** – the second letter indicates the hardness of the disc. The further into the alphabet, the harder the disc.

### 2 Product lines

perfect | evolution | special

Explanation see next page.

### 3 Red background

Is the colour guideline for grinding discs.

### 4 Safety standards

Our products comply with the highest safety standards and regulations:

EN 12413 - cutting and grinding wheels

OSHA - organisation for the safety of abrasives.

### 5 Measurements

Consist of (diameter of the disc)

x (thickness of the disc)

x (bore size).

Measurements given in mm and inch.

### 6 Expiry date

This quality cutting disc can be used without any restrictions until the indicated date.

(V month/year)

### 7 Max. rpm.

Indicates the permitted maximum speed.

### 8 FE/S/CI ≤ 0,1%

Free from iron, sulphur and chlorine.

Special disc for cutting stainless steel.

### 9 Security information

Security information: For your own safety.

Please follow!

### 10 Red bar

Indicates 80 m/s as permitted peripheral speed.

#### Green bar

Indicates 100 m/s as permitted peripheral speed.

### 11 Made in Germany

Stands for proven quality -

most of our products are manufactured and tested in Germany.

## Product lines

For craftsmen or industrial use - three precisely co-ordinated product lines offer the right grinding disc for every user and every application. All discs comply with the relevant regulations, have a high specific grinding capacity and guarantee a maximum of safety.

### perfect line

The best-seller. Not only brilliant with its price/performance ratio. It has proven itself a million times. The perfect line shows best results on every angle grinder.

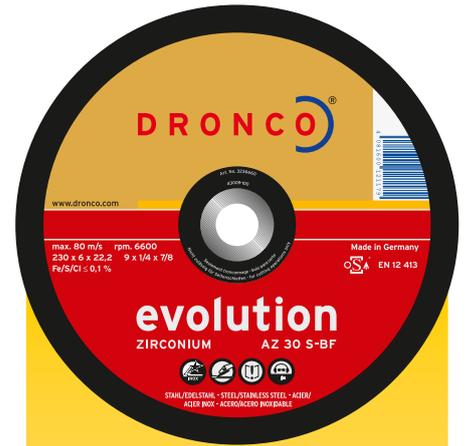

- resin bonded
- reinforced with glass fibre
- good lifetime
- good removal rate

### special line

Professional use needs for every application the right disc. Therefore abrasive grits and bonds match exactly the material - this increases the performance and minimises the working time.

- very good lifetime
- very „agressive“ disc
- very good removal rate
- very good economic efficiency

### evolution line

The high end line for highest demands. These grinding discs have a brilliant lifetime and outstanding grinding efficiency at minimal effort.

- outstanding lifetime
- best raw materials
- maximum removal rate

# CERAMAXX

## OUR STRONGEST DISCS!

WITH CERAMIC GRAIN OF THE LATEST GENERATION  
GIVING AN ULTIMATELY INCREASED PERFORMANCE

- ▶ Durably aggressive removal performance = high productivity
- ▶ Lowest energy input = sparing for man and machine
- ▶ Quiet-running and smooth grinding = comfortable handling
- ▶ Cool grinding without thermal blueing = less rework
- ▶ Excellent lifetime = reduced disc consumption

### AK 36 T CeraMaxx

evolution

metal

★★★★★

The Evolution AK 36 T is the first 3 mm grinding disc with ceramic grain which does not require a backing pad and which can simultaneously be used as a fully-fledged cutting disc. CeraMaxx discs are among the fastest, most aggressive and most durable on the market giving greatly increased productivity and efficiency with maximum removal rates and an unmatched speed of grinding performance.

Ideal for users from pipeline engineering and construction, shipyards, metal engineering, foundries, commercial vehicle construction, steel construction, plant engineering, crane construction, construction machine production.

Combined grinding and cutting disc for the preparation and removal of welding seams, removal of welding splatter, descaling, rough deburring and grinding on stainless steel and steel. Fe/S/Cl ≤ 0,1 %.

### AK 24 V CeraMaxx

evolution

metal

★★★★★

High performance grinding disc with increased productivity and up to three times higher material removal compared to standard discs. Maximum aggressiveness with comfortable handling. Better efficiency thanks to an enormous lifetime. Excellent performance at low pressure.

Ideal for users from pipeline engineering and construction, shipyards, metal engineering, foundries, commercial vehicle construction, steel construction, plant engineering, crane construction, construction machine production.

CeraMaxx grinding discs are ideally suitable for demanding grinding works: Preparation and removal of welding seams, removal of welding splatter, descaling, rough deburring and grinding on stainless steel and steel. Fe/S/Cl ≤ 0,1 %.

## Some general information

The following information gives you the best possible overview about the features of our products.

### 1 Description

A – normal corundum is the abrasive band for mild steel.

AZ – Zirconium corundum is the abrasive band for stainless steel.

AK - Ceramic grain is the new, self sharpening abrasive band for steel, stainless steel, high alloy steel, brass and bronze.

40 – indicates the grit size.

The higher the number, the finer the grit.

E.g.: 40 rough | 60 medium

80 fine | 120 very fine

### 2 Product lines

perfect | evolution | special

Explanation see next page.

### 3 Yellow background

Is the colour guideline for flap discs.

### 4 Safety standards

Our products comply with the highest safety standards and regulations:

EN 13743 - flap discs

oSA\* - organisation for the safety of abrasives

### 5 Measurements

Consist of (diameter of the disc)

x (bore size).

Measurements given in mm and inch.

### 6 Max. rpm.

Indicates the

permitted maximum speed.

### 7 Red bar

Indicates 80 m/s as

permitted peripheral speed.

### 8 Security information

For your own safety. Please follow!

### 9 Made in Germany

Stands for proven quality -

most of our products are manufactured and tested in Germany.

### 10 www.dronco.com

24 hr service on our website

- we are always there when you need us!

## Product lines

For craftsmen or industrial use - three precisely coordinated product lines offer the right flap disc for every user and every application. All discs comply with the relevant regulations, have a high specific grinding capacity and guarantee a maximum of safety.

### perfect line

The best-seller. It has proven itself a million times. The abrasive band made of normal corundum enables a good material removal rate compared with a very attractive price.

- good material removal rate
- good lifetime
- very good price-performance ratio

### special line

Effective, long-lasting and economical. Flap discs from our special line with abrasive bands made of zirconium corundum are optimised for grinding on edges and surfaces in industrial use as well as for craftsmen - this increases the performance and reduces the working time.

- very good lifetime
- no clogging
- very good material removal rate
- easy working

### evolution line

The high-end line for highest demands. These flap discs offer outstanding lifetime, plus high removal rate with minimum effort.

- outstanding lifetime
- best raw materials
- outstanding material removal rate
- optimum efficiency

#### Professional application

Top product: extremely aggressive stock removal, outstanding service life, minimum effort

#### Demanding application

Very good stock removal, high service life

#### Standard application

Good stock removal, good service life

You can get DRONCO flap discs in different performance classes - from a standard product for occasional use up to the high-end product for professional applications.

On the following pages you will always find the corresponding symbol for the respective performance class of the tools in the heading of each type.

### Evolution AZ Maxx zirconium corundum flap disc

- same advantages as AZA
- increased height of lamellas
- steeper arrangement of lamellas
- aggressive material removal rate

### Perfect A normal corundum flap disc

- tough and hard abrasive grain
- good removal capacity, especially for surface work
- good service life

### Perfect C silicon carbide flap disc

- polyester backing
- very hard abrasive grain
- for stone treatment
- good removal rate

### Special AZ zirconium corundum flap disc

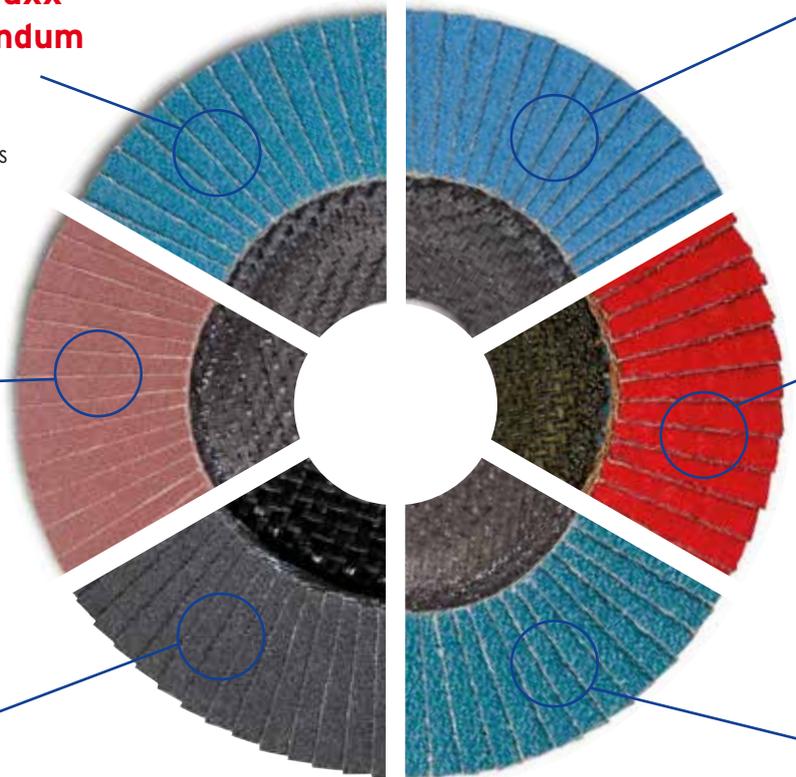

- abrasive grain is less hard, but very tough
- for working on edges and stainless steel
- brilliant grinding capacity
- outstanding service life

### Evolution G-AK ceramic grain flap disc

- self-sharpening
- robust polyester backing
- permanent extremely high stock removal
- cool grinding on surfaces and edges
- improved service life

### Special AZA zirconium corundum flap disc

- support of the abrasive band consists of a cotton twill
- for surface grinding on steel and stainless steel
- good grinding capacity
- outstanding service life
- no clogging up

## Flap discs zirconium corundum

G-AZ A

special

Zirconium corundum

★★★★☆

Mild steel, stainless steel, etc.

The support of the abrasive band consists of a cotton twill which shows an outstanding removing rate and excellent lifetime - without clogging up!  
The glass fibre backing is characterised by an even grinding finish up to the complete consumption of the abrasive grain. As a result, no scratches on the workpiece will appear.

Packing unit: 10 pcs.

- ▶ Ideal for grinding surfaces of mild and stainless steel.
- ▶ Very good stock removal and effortless working without clogging.

K-AZ A

special

Zirconium corundum

★★★★☆

Flap disc with glass fibre reinforced plastic backing available in type "straight" only.

Newly developed zirconium abrasive cloth with outstanding material removal rate and service life. Does not leave any marks on the work piece.

Packaging unit: 10 pcs.

For surface and edge grinding.

- ▶ no scratches, no markings of the work piece
- ▶ newly developed abrasive cloth
- ▶ extremely tough reinforced plastic backing
- ▶ outstanding removal rate
- ▶ excellent lifetime
- ▶ can be used on the outer edge

special

Zirconium corundum

★★★★

This abrasive grain is less hard, but very tough, and gives the disc very good all purpose characteristics. It is used for such demanding operations as deburring, machining welding seams and breaking edges. The glass fibre backing is characterised by an even grinding finish until all of the abrasive grain has been worn away. Leaves no scratches on the workpiece.

Packing unit: 10 pcs.

| Stainless steel, steel, cast, etc.

- ▶ Ideal for working on edges of mild or stainless steel.
- ▶ Brilliant grinding capacity with outstanding service life.

## G-AZ MAXX

## evolution

## Zirconium corundum

## ★★★★

The G-AZ MAXX flap disc is a high-end product for all users who recognise quality. Its increased number of lamellas ensures an even more aggressive material removal rate (steeper arrangement of lamellas) and a much higher lifetime than the AZ type. Improved tried-and-trusted topquality to optimize the efficiency of your tool. G-AZ MAXX means: Less downtime, more efficient working. Packing unit: 10 pcs.

For mild steel and stainless steel. For grinding on edges as well as surfaces. Ideal for sheet metal working, tank construction, metal construction.

- ▶ Increased number of lamellas for MAXXimum removal rate.
- ▶ Distinctly increased lifetime compared to G-AZ.
- ▶ Optimise the efficiency of your tool.

## Flap discs ceramic grain

G-AK

evolution

Ceramic grain

★★★★

An innovative new flap disc with self-sharpening ceramic grain, which guarantees a permanent and extremely high stock removal as well as a long service life. The ceramic grain on this innovative abrasive cloth is fixed on a robust polyester backing. Fully resinoid bonded with fillers for active grind support guarantees the abrasion resistance of the ceramic grain especially under high pressure. Outstanding results when grinding on surfaces as well as on edges on mild steel or stainless steel. Due to the high load capacity ideally suitable for extreme grinding applications or special tasks for steel, stainless steel, titanium-base alloy, nickel-based superalloy, chrome-steel and chromium-nickel steel, brass and bronze. Packing unit: 10 pcs.

3 times better than zirconium:

- ▶ Improved stock removal and effortless working
- ▶ Increased economic efficiency by noticeable time saving
- ▶ Improved service life
- ▶ Optimum Strength
- ▶ Self-sharpening
- ▶ Cool grinding on surfaces and edges

Sheet metal working, tank construction, cast iron, pipes and bars, metal constructions. Ideally suitable for steel, stainless steel, titanium-base alloy, nickel-based superalloy, chromesteel and chromium-nickel steel, brass and bronze.

Ceramic grain

★★★★

**JET**ceramic

High-End Product: Flap disc with glass fibre reinforced plastic backing. Ceramic grain abrasive on polyester cloth. Fully resinoid bonded with fillers for active grind support. Self-sharpening ceramic grain for extremely high, permanently available stock removal as well as a long service life.

Packing unit: 10 pcs.

- ▶ Quick to mount thanks to the integrated M 14 adaptor
- ▶ Air-cooled with cooling slots integrated in the backing
- ▶ Reinforced glass fibre plastic backing

For the processing of steel and stainless steel, high-alloy steels, chrome and chrome nickel steel, titanium alloys, brass and bronze.

## With the right material to highest perfection. The new DRONCO POLISHING FLAP DISC.

The DRONCO polishing flap disc delivers outstanding results through an innovative, highly effective grinding fleece arranged in a fan-shaped lamella structure. Especially adjusted for working on stainless steel, steel, aluminium, and non-ferrous metals.

Depending on the texture of the fleece, DRONCO polishing flap discs are perfectly suitable for

- ▶ Descaling and derusting work-pieces
- ▶ Preparing and repolishing welding seams
- ▶ Preparing surfaces for varnishing
- ▶ Polishing stainless steel
- ▶ Surface processing

Available in three textures in dimensions of 115mm and 125mm.

- **Highly effective for the use in welding technology and metalworking**  
Optimum results e.g. during the preparation of welding seams, the finishing of welding seams and removal of welding spillage in accordance with EN ISO 5817. Removes oxide film/annealing colours after welding of pipes, containers and apparatus or after the plasma-arc cutting of stainless steel sheet metals in accordance with DIN 50930, DIN 25410, DVGW W541.
- **Highly effective for the use in painting technology**  
Perfect to derust, removal of colours and prepare of painting surfaces
- **Versatile usage**  
Cleaning and polishing of unalloyed steel, high alloyed steel, aluminium and non-ferrous metal. Suitable for grinding on edges and surfaces.
- **High service life**

## Polishing flap disc for angle-grinders

## The innovation for polishing and cleaning The new DRONCO POLISHING FLAP DISC

Grinding thin welding seams and removing thermal bluing

Professional derusting and descaling

Descaled surfaces prior to welding lead to clean welding seams

## A multi-talented performer for corners and angles

- ▶ the soft fleece hugs the surface of the workpiece to perfection
- ▶ flexible application for corners, angles, U-profiles, on rounded or flat surfaces
- ▶ fast and simple removal of rust, cleaning and blank polishing of metals
- ▶ cleaning, smoothing and polishing welded seams for corners, angles and fillet welds
- ▶ removal of temper colour, oxide layers or thin layers of paint on metals
- ▶ suitable for stainless steel, steel, aluminium and nonferrous metals

The new polishing wheel gives a perfect shine to corners, angles, rounded and flat surfaces.

It combines the outstanding performance of the polishing flap disc with an added bonus. The new polishing wheel is ideal for cleaning difficult-to-reach areas effectively and polishing them to a fine finish.

## Polishing wheel in an individual promotional pack

★★★★

Polishing wheel with upright flaps made from high performance non woven material with a reinforced plastic backing. This flexible material hugs the work piece to perfection. It can be used both on the edge in corners, angles and rounded edges as well as on its face for flat surfaces. Suitable for the removal of rust, cleaning and blank polishing of work pieces made from stainless steel, steel, aluminium and non-ferrous metals. Cleaning and polishing of welding seams in corners, angles or fillet welds. Removal of any discoloration, oxide layers and thin layers of paint.

### Polishing compound, single, 110 Gram

★★★★☆

Polishing compound white = pre-polishing steel and stainless steel.  
Polishing compound brown = pre-polishing of non-ferrous metals  
Polishing compound blue = gloss-polishing.

DESCRIPTION	DIMENSION GRAM	CONTENT PC.	ITEM CODE	BAR CODE 4081600
Polishing compound white	110	1	6400403	707328
Polishing compound brown	110	1	6400402	707311
Polishing compound blue	110	1	6400404	707304

## Recommended use:

- ▶ To start, process the work piece with the coarse G-VA Polishing flap disc followed by fine.
- ▶ The Gloss Polishing flap disc is always used with a corresponding polishing compound.
- ▶ Step 1: Start with a white or brown pre-polishing compound.
- ▶ Step 2: Use a new Polishing flap disc with a blue high-gloss polishing compound in order to obtain a high-gloss surface.
- ▶ For the polishing of aluminium and non-ferrous metals, use a brown polishing compound especially for these materials.
- ▶ With a reduced working speed of 4.500 rpm, better polishing results are achieved than with the angle grinder at full speed.

## Brilliant results in 3 steps with our 10 pcs. Professional Polishing System

# 1

### Pre-Polishing with Sisal cloth and polishing compound:

- ▶ white for stainless steel
- ▶ brown for non-ferrous metals
- ▶ most important step after grinding
- ▶ high stock removal

# 2

### Polish with Notiflex® 914 in conjunction with polishing compound:

- ▶ white for stainless steel
- ▶ brown for non-ferrous metals
- ▶ hard cloth
- ▶ even surface

# 3

### Mirror-finishing with Notiflex® 925 in conjunction with blue polishing compound

- ▶ short process time
- ▶ light contact pressure

### Polishing System, 10 pcs.

For use on drilling machines, flexible shafts, angle polishers and stationary polishing stands for ultimate polishing in 3 steps.

Content of package:

- 6 Cloth discs: 2 x Sisal cloth, 2 x Notiflex® 914, 2 x Notiflex® 925
- 3 x polishing compound (white, brown, blue)
- 1 x drive arbor

Processing on pots, processing on mountings, automotive industry, builder's hardware

DESCRIPTION	DIMENSION MM	SPEED R.P.M.	ITEM-CODE	BAR CODE

### PLEASE OBSERVE

**Notiflex®: High quality randomly-placed fibre.**

**Advantages: no seams, little heating, 30 % less polishing compound use in relation to commercial polishing buffs. Not suitable for work on edges!**

## Coarse cleaning fleeces

Dronco cleaning fleeces produce optimum results when used to grind and rub down metal, stainless steel, wood or plastic surfaces and can be used as a preliminary stage before polishing. They are made of intertwined nylon fibres which are then immersed in synthetic resin and gently hardened. They are available with a glass fibre backing or for the use with straight or cylindrical grinders.

### Coarse cleaning fleeces for the use on angle-grinders

★★★★☆

Suitable for cleaning and polishing all surfaces.  
Packing Unit: 10 pc.

Removal of old paint, rust and welding splatter without scratching the surface of the work-piece, cleaning and smoothing wood and plastic, polishing of stainless steel and removal of thermal bluing.

## More grinding luxury for your customers

The coarse cleaning fleece with best results during test

For better depiction, the guard of the angle-grinder was removed for picture taking.

Please make sure to use the coarse cleaning fleece on your angle-grinder with appropriate safety precautions only.

## The Label - briefly explained

The label of the diamond blade contains all important information about the product.

### 1 Description

Consists of the purpose and performance class (3 / 4 / 5 / 7): e.g. U5

U - Universal

S - Stone Plates

F - Tiles or Stoneware

B - Concrete

G - Granite and Hard Stones

A - Abrasive Stones and Asphalt

AM - Mortar Raking

### 2 Product Lines

perfect | superior | evolution | xtreme

More details on page 91.

### 3 Safety Standards

Our products comply with the highest standards and regulations:

EN 13 236 - diamond tools

OSHA - The Organization for the Safety of Abrasives

### 4 Dimensions

Consist of [diameter of the blade]

x [thickness of the segments]

x [bore size].

Dimensions given in mm.

### 5 max. RPM

Indicates the permitted maximum speed.

In this example 6600 rpm.

### 6 Directional Arrow

Indicates the direction

of rotation of the blade.

### 7 Red Bar

Indicates 80 m/s as permitted peripheral speed.

### Green Bar

Indicates 100 m/s as permitted peripheral speed.

### 8 Safety Information

For your own safety. Please observe!

THE RIGHT TOOL  
**FOR EVERY TASK**

## Many years of experience for best quality

Diamond tools have been part of our range for more than 30 years. During this period an in-depth knowledge has been achieved, which our customers benefit from.

## Innovation

Always one step ahead

Our R+D team is working in modern laboratories on future-oriented technologies for abrasive tools, resulting in product innovations and a continuous improvement of existing products with regard to cutting ability, lifetime, speed and precision. As a result, significant performance improvements of more than 30 % in the sector of diamond tools have been achieved in the past few years.

## Diamonds

DRONCO relies on synthetic diamonds

The diamonds are responsible for the actual cutting work of the tool. DRONCO uses synthetic diamonds which have the same degree of hardness as natural diamonds. In comparison to their natural counterparts, they offer the advantage of an ideal structure that always remains the same. Both grain size and the crystalline shape of the diamonds are adjusted to the optimum parameters for the respective field of application in order to achieve perfect cutting abilities and a high lifetime.

## Highest Safety Standards

In terms of safety and quality, DRONCO diamond cutting blades are manufactured and tested according to the latest standards, regulations and norms. Our quality management system ensures that we meet the high demands of a modern, worldwide acting industrial enterprise on all levels. Certification in accordance to DIN EN ISO 9001:2008 is therefore just as normal as our oSa membership (Organization for the Safety of Abrasives).

## Tested Safety According to EN 13 236 and oSa

### EN 13 236

European safety standard for diamond tools

### oSa

The Organization for the Safety of Abrasives

# OUR PRODUCTS SAFETY FIRST!

Being a member of oSa, we do everything to make our abrasive tools as secure as possible.

## Core Geometry

Introducing the various core shapes used for our diamond cutting blades.

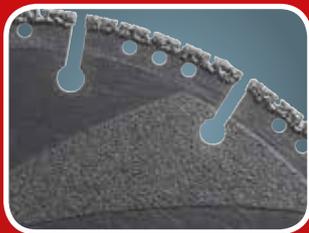

### Standard Segmentation (C3)

- narrow gullet
- small slots with slot holes

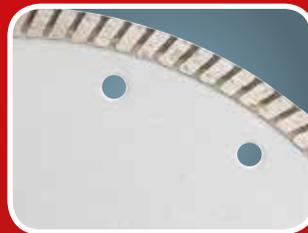

### Continuous Rim (GRF)

- stable running
- cutting edges without chipping

### Standard Segmentation Diamond Brazed

- small slots with slot holes
- segments directly coated with diamonds in a vacuum-process
- good discharge of material

### Continuous Turbo Rim

- stable running
- clean cut without chipping

### Turbo Segmentation (C3)

- small slots with slot holes
- aggressive fast cut
- higher lifetime

### Wide Segmentation (C1)

- normal gullet
- wide slots
- good discharge of material

### Speed Segmentation (C3)

- narrow gullet
- small slots with slot holes
- aggressive fast cut
- outstanding lifetime, no cooling breaks
- suitable for cutting metal

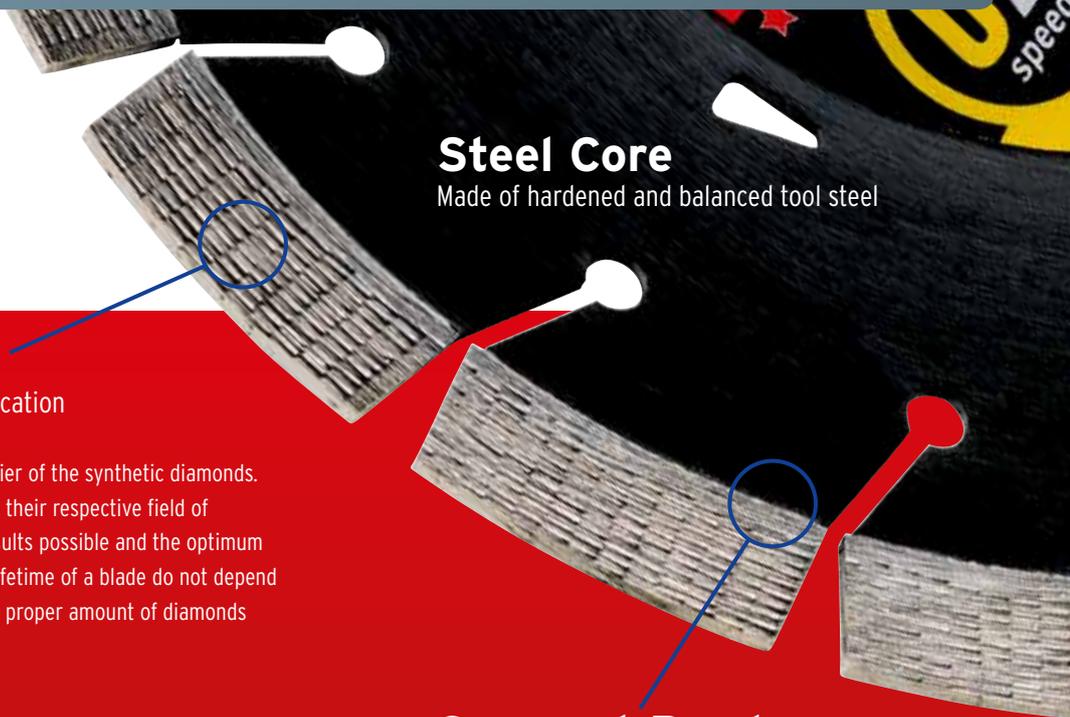

### Wide Segmentation with Core Guard Segments (C1S)

- normal gullet
- wide slots
- good discharge of material
- core guard segments to protect the core as well as to prevent undercutting

## VIBRATION AND NOISE CAN BE REDUCED EFFECTIVELY

Our "Protect" blades are using special sandwich steel cores which are reducing vibration and noise noticeably during the cutting operations.

## Steel Core

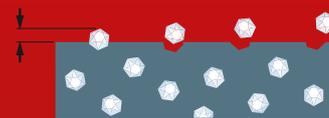

Made of hardened and balanced tool steel

## Diamond Segment

The ideal material for all fields of application

The bond of the individual segments is the carrier of the synthetic diamonds. The high-tech bonds are specifically adapted to their respective field of application in order to ensure both the best results possible and the optimum wear of the bonds. The cutting ability and the lifetime of a blade do not depend on the highest concentration, but rather on the proper amount of diamonds and the composition of the bond:

**Hard Material → Soft Bond**  
**Soft Material → Hard Bond**

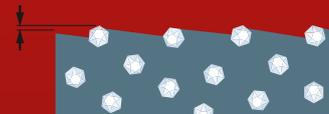

### Poor - excessive wear of the bond

The diamond grain separates prematurely, resulting in a shortened lifetime.

### Poor - insufficient wear of the bond

The diamond grain is polished or broken off on the bond level. New diamonds cannot be released and the blade loses its cutting ability.

### Perfect - optimum wear of the bond

The diamond grain is evenly released. The blade maintains its cutting ability and achieves an ideal lifetime. The trail of the bond perfectly supports the diamond grain and ensures an optimum cutting ability.

## Segment Bond

Joins the steel core and the segment

There are two methods for permanently joining the diamond segments and the steel core:

### Laser welding

This method is characterized by the fact that the diamond segments are permanently welded to the high-quality steel core. As segment losses can almost be completely excluded, this method ensures the best operational safety possible.

### Sintering

During this process, the segments are sintered to the steel core by applying high pressure and temperature.

## DRY CUTTING BLADES

DRONCO diamond cutting blades for dry cutting can be used for wet cutting as well without any concern.

## WET CUTTING BLADES

DRONCO diamond cutting blades for wet cutting may only be used on water-cooled machines!

## Strong content - Strong outfit

We think a top product needs an appealing packaging. That's why DRONCO does not use a random solution, but a carefully thought out, eye-catching outfit to inform and convince our customers visually and haptically.

The outstanding product quality and high-class brand image will help to showcase you as a distributor as well. Our self-explanatory packaging facilitates the consulting of your customers and therefore improves the sales.

### Completely Protected

The carton sleeve with closed sides protects the product ideally.

### Colour Coding System

Six colours ensure a quick orientation. Read more on page 92.

### QR Code

Learn more about the product by scanning the QR code on the packaging.

### Concise Description

The product name consists of purpose, product line and additional features.

### Clear View on the Product

Most of the steel core and the diamond segments are visible.

### Illustrated Application

Recognize the field of application at a glance.

### Clear Information

All relevant information on the product as well as the packaging are easy to comprehend. Multilingual recommendations of application can be found on the reverse of the packaging (16 languages).

### The Segment Check

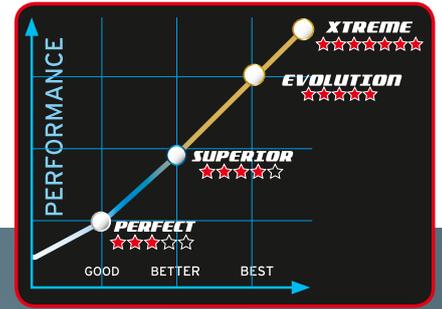

"Feel the Power". The cut out packaging allows you to "feel" the diamond segments.

## Our Product lines - For all demands

Three quality lines based on the good-better-best-principle: From the solid craftsmen quality, which is used by semi-professionals as well, to the absolute high-end tools for the intensive use on construction sites; DRONCO has the right tool for all demands.

**BEST**

High performance diamond cutting blades for the professional user to meet high expectation on demanding application. Maximum cutting speed and outstanding lifetime. Wide range of application. The Evolution and Xtreme line can be recognized by their gold labels and 5 or 7 stars.

**BETTER**

Premium tools for the professional user. Effective, durable and economical. Convincing in daily use thanks to their fast cutting speed and good lifetime. Outstanding price-performance ratio. The Superior line can be recognized by its blue label and 4 stars.

**GOOD**

The economically priced assortment for many different tasks in approved craftsmen quality. Good lifetime and fast cutting speed at an attractive price. For users who place the emphasis on quality but don't need a high-performance tool for continuous use. The Perfect line can be recognized by its silver label and 3 stars.

## The right cutting blade found instantly

Our colour coding system on the packaging of the diamond cutting blades features six distinctive colours, each for a different field of application. Additionally the materials which the blades are suitable for are illustrated on the carton sleeves. Thanks to the detailed application chart, you can easily determine which diamond cutting blade is the best choice for your field of application.

## COLOUR CODING SYSTEM:

### Universal

Yellow

### Concrete

Green

### Tiles/Stoneware

Turquoise

## DO YOU NORMALLY CUT THE SAME OR DIFFERENT TYPES OF MATERIAL?

#### Same material

We recommend using the following blades:

A4, B4, B5 and G4

#### Different materials

For applications with a wide range of materials we recommend using the following blades:

U3, U4, U4 speed, U4 protect, DB4, U5 speed, U5 protect and U7 speed

## Stone Plates

Orange

## Granite and Hard Stones

Navy Blue

## Abrasive Stones and Asphalt

Red

## WHEN SHOULD YOU USE A BLADE WITH A CONTINUOUS RIM?

If you want to cut materials where a clean cut is required (e.g. tiles, glazed bricks, stoneware), we recommend you to use one of the following blades:  
S3 turbo, S5 turbo, S5 turbo protect, F3, F4 cera and F5 cera speed

The continuous rim prevents the edges from chipping, guaranteeing a brilliant cutting result. Blades with a continuous rim should only be used up to a cutting depth of 2 cm when cutting dry.

In the application chart you will find the diamond blades pre-sorted according the field of application. You can see which disc is most suitable for different material.

## On which type of machine can the blades be used?

These information can also be found in the descriptions of each type on the following pages.

**Bore 22.23 mm for angle grinders**

**Bore 25.4 mm or 30 mm for table saws**

**Bore 20 mm or 22.23 mm or 25.4 mm for petrol saws**

You can get DRONCO Diamond cutting discs in different performance classes - from a standard product for occasional use up to the high-end product for professional applications. On the following pages you will always find the corresponding symbol for the respective performance class of the tools in the heading of each type.

## PROFESSIONAL APPLICATION

High-end product: extremely fast cutting, outstanding lifetime, minimum effort

## DEMANDING APPLICATION

Very good cutting performance, high lifetime

## STANDARD APPLICATION

Good cutting performance, good service life

## Universal | Construction site materials

**ST-7** **quality** **Dry and wet cutting** ★☆☆☆

Sintered, segmented diamond cutting disc.  
All-round diamond cutting disc at a fair price.  
Packing unit: 1 pc.

| All kind of construction site material

**DB4 superior Dry and wet cutting ★★★★★**

The all-round product with a voracious appetite for cutting - for universal use in a broad range of applications on construction sites or by emergency services. The steel blade is directly coated with diamonds in a special vacuum process.  
Packing unit: 1 pc.

Very good cutting abilities in many materials such as artificial and natural stone: concrete, reinforced concrete, exposed aggregate concrete, concrete paving, Indian granite, quarry slabs, granite slabs, sandlime stone, bricks. Metals: iron constructions and iron profiles, cast iron, sheet metals, non-ferrous metals, ductile pipes. Plastics, fibreglass, carbon fibre, wood, rubber, etc.

## U5 protect

## evolution

## Dry and wet cutting

Laser welded all-round diamond disc with a special sandwich steel core, which reduces vibration noticeably and noise by 50 %. The segments are made of high performance diamonds and a bonding designed for extremely high cutting speeds. Clean cutting properties and a very good lifetime are also features of this product. The field of applications ranges from hard to soft materials, abrasive materials, as well as reinforced materials. The disc can be used without cooling brakes. Packing unit: 1 pc.

All kind of construction site materials, e.g. concrete, reinforced concrete, exposed aggregate concrete. Usable for hard stones, gneiss, granite, clinker bricks, porphyry, bricks, ductile and cast pipes etc.

Do you know the latest legal regulations based on the EU guidelines for protecting workers from noise and vibration? The U5 protect allows responsible employers to provide their staff with tools, which significantly reduce health damaging factors in the work environment. A reduction in noise level by minus 10 db(A) = halving the volume. The U5 protect features an extraordinary high-tech steel core, which reduces the sound level by 50 %. This also makes the experience of the cutting procedure around the construction site much more pleasant. Another bonus for the operator is the noticeably lower vibration level. These two factors add up to important protection for the health of the operator. And this is achieved with no loss in performance. The U5 protect offers outstanding cutting speed and the lower vibration level also reduces wear and tear on the segments - increasing the lifetime of the product.

### 50% less noise, noticeable less vibration

- ▶ high-performance diamonds for outstanding cutting speed
- ▶ excellent lifetime
- ▶ no cooling brakes
- ▶ noise and vibration reduced

**Dry and wet cutting**

★★★★★★

The special, geometrically arranged diamonds within the segments of the ultra fast and indestructible, laser welded all-round blade guarantee outstanding cutting abilities. It's the perfect product for the intensive, professional use. No cooling brakes needed. Packing unit: 1 pc.

All kind of construction site materials, e.g. concrete, reinforced concrete, exposed aggregate concrete. Usable for hard stones, gneiss, granite, clinker bricks, porphyry, bricks, ductile and cast pipes etc.

The new U7 speed sets standards and combines all the features a top all-round disc can offer:

- ▶ Extremely high cutting speed thanks to its innovative segment technology with geometrically arranged high-performance diamonds. Segments and bond have been optimized for an optimum cutting speed and universal use.
- ▶ Flat 15 mm segments with compact volume, a high diamond density and an optimized bond ensure an outstanding lifetime during the daily all-round use.
- ▶ Effortless cutting without physical exertion.

**S5 turbo protect**      **evolution**      **Dry and wet cutting**      ★★★★★

Very comfortable turbo diamond blade with sandwich steel core.

For cutting of natural and artificial stone plates.

Packing unit: 1 pc.

Professional turbo blade also suitable for thicker stone plates of concrete, natural stone, roof tiles and terrazzo.

- pleasant working due to low vibration and reduced noise
- excellent cutting speed
- outstanding lifetime
- laterally extended segments for faster material ejection
- waved steel blade for optimal cooling
- the perfect combination for satisfactory working comfort, with good cutting ability at an attractive price

\*S5 turbo protect - 8 db (A), dimension 230 mm, in comparison to a U4 diamond blade

## S5 turbo

evolution

Dry and wet cutting

★★★★★

The premium turbo blade from DRONCO. The new type of 9 mm castle segments and a smooth, perforated stainless steel core are the prime features of this product. With this turbo blade you don't have to worry about limitations to the cutting depth. Smooth running, excellent all-round qualities, outstanding lifetime and clean cutting edges make this product a real all-rounder on any construction site. Especially for roofers and garden and landscape construction.

Packing unit: 1 pc.

Professional turbo blade also suitable for thicker stone plates. Very good cutting results and lifetime in concrete, concrete roofing slabs, gneiss, granite, terrazzo, bricks, roofing tiles.

## F5 cera speed

## evolution

## Dry and wet cutting

Thanks to its thickness of only 1.2 mm and the special geometry of the continuous rim, the F5 cera speed ensures both, an exceptional cutting speed and a comfortable and smooth operation. The 10 mm segments guarantee an optimum lifetime. The integrated flange around the bore makes sure that the blade can be used safely in every situation.

Packing unit: 1 pc.

- ▶ 1.2 mm thin cutting rim with special geometry
- ▶ clean cutting edges
- ▶ minimal material loss
- ▶ exceptionally fast cutting
- ▶ easy to use
- ▶ 10 mm segment height

For cutting quarry tiles, stoneware and granite slabs.

## Diamond tile drill CeraDrill

The new Dronco CeraDrill drill-bits with vacuum-brazed diamond coating for maximum drilling performance.

They are used where conventional carbide or diamond drills reach their limits. The CeraDrill drill bit has an integrated cooling liquid that is released during the drilling operation.

Water cooling with its inconveniences is no longer necessary. Work efficiently and cleanly with CeraDrill.

- ▶ Integrated cooling liquid
- ▶ Simple and efficient working
- ▶ No water cooling required
- ▶ For tiles, stoneware, quarry tiles

### CERADRILL DIAMOND TILE DRILL

The drills are supplied with a protective cap. The cap has to be removed before the first use. After completion the cap must be refitted.

| For tiles, stoneware and quarry tiles.

DIMENSION DIAMETER X SHANK DIAMETER X LENGTH [MM]	ITEM CODE	BAR CODE 4081600
5 x 12 x 35	4000601	400809
6 x 12 x 35	4000602	400816
8 x 12 x 35	4000604	400830
10 x 12 x 35	4000605	400847
12 x 12 x 35	4000606	400854
14 x 12 x 35	4000607	400861
Drilling aid	4001100	400939

**Only for drilling without hammer! Optimal speed = 1500 rpm.**

### Operating instructions:

- ▶ Remove the protection cap.
- ▶ Start the drilling at an incline, then move to horizontal.
- ▶ Use the drilling aid for vertical drilling.
- ▶ Remove dust.
- ▶ Work with rotatory moves.
- ▶ A cooling break of 2 minutes is required after every hole.
- ▶ Clean the head after every hole with the cleaning stick provided (push dirt and dust inside the drill).
- ▶ When you have finished the application, refit the protective cap onto the drill.

### Advice:

We recommend a trial drilling in a tile before you make a drilling operation in an already tiled bathroom!

## Diamond dry drill for angle grinders

available in twelve diameters from 20 up to 85 mm

### The correct preparation and use:

max. r.p.m. 11.000

▶ We recommend the use on an angle grinder for 125 mm discs

## Diamond core bits

for dry drilling of wall sockets and distribution boxes.

They provide the ideal means of cutting holes for wall sockets and light switches (68 mm) or distribution boxes (82 mm). (Other diameters available upon request)

## DRONCO 1-2-3-System for manual sanding. Easy to handle and effective!

### COLOUR CODED SHEETS FOR EASY RECOGNITION AS EXAMPLES BELOW:

1 <sup>st</sup> STEP: PRE-SANDING	2 <sup>nd</sup> STEP: SANDING	3 <sup>rd</sup> STEP: FINISHING
Pre-sanding with grit 80 for coarse grinding such as the removal of chipped paint and varnish as well as rounding of edges and burr removal.	Sanding with grit 120 for grinding works such as rust removal, effective paint removal and sanding of deep scratches and metal processing.	Finishing with grit 220. With this grit, you will obtain the optimum surface for subsequent glazing, painting or oiling of furniture.

## DRONCO 1-2-3-System for manual sanding - easy to handle and effective! Ergonomic Mini-Sander

Mini Sander Set 91x27 mm

Dronco 1-2-3 System

Hand sanding

The Mini Sander is an easy-to-handle and effective grinding tool.

Pressure can be applied with the index finger which makes it possible to reach areas which are difficult to access. Very suitable for the restoration of furniture and for refurbishing windows, doors and window shutters.

The DRONCO 1-2-3 Mini Sander Set contains the ergonomic Sander plus 30 sanding sheets in three different grit. The abrasive paper can be used for both wood as well as metal.

Ergonomic Mini Sanding System for wood, metal, plastics, varnished surfaces and many more.

## DRONCO 1-2-3-System for manual sanding - easy to handle and effective! Ergonomic Hexagon Sander

Hexagon Sander Set 150 x 75 mm    Dronco 1-2-3 System    Hand sanding

With its ergonomic shape, the Hexagon Sander is the perfect tool for all sanding projects. It enables an especially easy-to-handle, smooth and effective sanding of larger surfaces that also reaches into corners, areas which are hard to access or on longer edges. The ideal tool for the restoration of furniture and for various sanding works for example on wood, fibreglass, plasterboard, metal or varnished surfaces.

Ergonomic manual sanding system for wood, metal, plastics, varnished surfaces and many more.

The DRONCO 1-2-3 Hexagon Sander set contains six abrasive sheets in three different grits. The abrasive sheets can be used on both wood and on metal.

- 2x K80
- 2x K120

## DRONCO 1-2-3-System for manual sanding - easy to handle and effective! Sanding Sponge Set

Sanding Sponge Set with Handle

Dronco 1-2-3 System

Hand sanding

This handle allows the comfortable use of Sanding Sponges - without having to hold the sanding sponge in your hand.

The Sanding Sponges adjust to the processed surface very well and enable a smooth grinding.

- ▶ 1x Coarse Sponge grit 80, suitable for removing varnish and paint
- ▶ 2 x Medium Sponges grit 120, suitable for grinding of hard and soft wood, residue for plasterboard, fibreglass or metal surfaces
- ▶ 1x Fine Sponge grit 220 for the optimum grinding of surfaces before the application of a paint, glazing or varnish coating as well as before the oiling of furniture with teak oil or other liquid wood waxes.

Ergonomic manual sanding system for wood, metal, plastics, fibreglass, varnished surfaces, plasterboard and many more.

## ✔ Semi-flexible discs for use on angle grinders

Because of the special disc build-up of the Semi-flexible discs a higher grade of removal is reached than with fibre discs, however with a coarser finish. They are available with normal corundum and silicon carbide.

Attention: A backing pad is necessary.

Speciality: Description SC 24 is also used for care of hoofs.

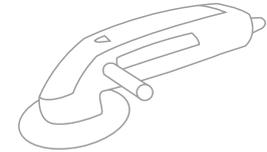

Semi-flexible discs	perfect SIC	Angle grinder				
	Additive coated disc with silicon carbide. Backing pad necessary!		Grinding of stone, mild steel and stainless steel, aluminium and plastic, care of hoofs (SC 24).

## Backings pads for use on angle grinders

For fibre discs and semi-flexible discs. The backing pad by DRONCO takes care of the proper support on the machine. Best possible working conditions and efficient, fast working are thus guaranteed.

### Backing pad

### Angle grinder

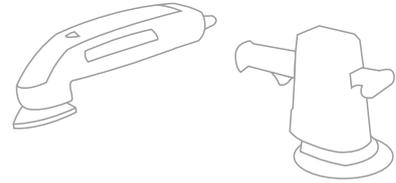

Safety when using fibre and semi-flexible discs. Good scratch pattern due to damping and flexibility of the backing pad.

## ➤ Abrasive paper for use on triangle and random orbital sanders

Abrasive paper for triangle and random orbital sanders is especially adjusted to the vibrational behaviour of these machines. Result: Low development of heat and high-quality surface finish. The practical velcro fasteners enable a quick change of papers without down time. Extraction holes ensure a smooth removal of abrasive dust.

## Perfect abrasive paper

## Triangle sander

This high-quality abrasive paper made from normal corundum assures an excellent surface finish with universal use - working on almost all materials. Thanks to the practical velcro fastener, down times are a thing of the past.

Backing material: E-paper

Coating: normal corundum semi-open

Bond: resin bond

Perfect DR 94/6 (94 x 94 x 94 mm) 6-holes

Metal, wood, plastic - suitable as well for varnish, paint and filling compounds.

## ▼ Economy rolls for hand sanding

Economy rolls are the ideal professional tool for hand sanding. Applications range from working of wood to grinding of metal. The very flexible cotton cloth can quickly be torn off and is delivered in a practical dispenser. The product is user-friendly and available in different lengths, widths and grit sizes.

Perfect - brown

Economy rolls

Hand sanding

Very high quality resin bond universal abrasive belt for hand sanding, delivered in a practical dispenser, especially suited for metal and stainless steel. Flexible, lengths easy to tear off cotton cloth.

Can be delivered in two lengths: 25 m, 50 m

Backing material: J-cotton cloth, very flexible

Grit: normal corundum Coating: close Bond: resin bond

Metal, stainless steel

## ➤ Abrasive belts for use on belt sanders

Portable belts for use on hand-guided belt sanders. They are intended for fast working of large, flat surfaces. The abrasive belts by DRONCO are very well suited for sanding of wood, paint and metal. According to grit size, a coarser grinding or smooth sanding with a good finish can be reached. They stand out for their high tearing resistance and optimal strain performance.

## Grinding cups

The high removal rate of these conical abrasives makes them the ideal solution for coarse grinding work. The maximum operating speed should not exceed 45 m/s.

Examples of possible applications:

- ▶ **cleaning of shutter boards**
- ▶ **grinding away concrete ridges after the removal of the formwork**
- ▶ **coarse grinding work in the metal-working industry**

**PLEASE NOTE**

**Max. R.P.M. 8500 - 50 m/s**

### Grinding cups metal

Suitable for all angle-grinders. Available in fine, medium, coarse.

Coarse grinding work on metal. The slight angle of the grinding cup also allows to work on welding seams.

DESCRIPTION	STRUCTURE	DIMENSION MM	CONTENT PIECES	ITEM CODE	BARCODE 4081600
AS 16 Q	Coarse	110/90 x 55 x 22,23	1	6311000	631005

## ▼ Hand stones

DRONCO hand stones are available in the following versions:

- ▶ EK 150/230 und EK 180/400: combined dressing stone. Coarse on one side, fine on the other. Scissors or scythe, these stones have the right grain for every type of metal.
- ▶ SIC 20/70: silicone carbide rubstone, ideal for working on the sharp edges of stove and floor tiles.
- ▶ EK 46: Diamond cutting discs may become blunt as a result of overheating or when used in a material which they are not determined for. They can be re-sharpened by simply cutting into this hand stone as deep as the segment height.

### Hand Stones

DESCRIPTION	DIMENSION MM	CONTENT PIECES	ITEM CODE	BARCODE 4081600
Diamond dressing stone EK 46	200 x 50 x 25	1	6552010	655209

#### PLEASE NOTE

Hand stones are used to re-sharpen knives, scythes or similar appliances.

...if it becomes necessary: diamond cutting discs may become blunt as a result of overheating or when used in a material which they are not determined for. They can be re-sharpened by simply cutting into this hand stone as deep as the segment height.

## ➤ Promotion box technical brushes with fast moving items

### ➤ Promotion box for drilling machines

### ➤ Promotion box „Profi“ for angle grinders

### PROMOTION BOX CONTAINING TECHNICAL BRUSHES

Technical brushes packed in attractive, self-explanatory promotion box. Available are boxes for the use on drilling machines or type "PROFI" for the use on angle grinders. Mixed contents description as below:

Pure sales success - for product shelves and sales counter, P.O.S.

#### Content promotion box for drilling machines, 54 pieces

12 x Lend brush PBW 6	Ø 25 x 6,0 x 0,30 mm
6 x Wheel brush RB 6	Ø 100 x 6,0 x 0,30 mm
20 x Wheel brush RB 6	Ø 75 x 6,0 x 0,30 mm
10 x Cup brush TB 6	Ø 50 x 6,0 x 0,30 mm
6 x Cup brush TB 6	Ø 75 x 6,0 x 0,30 mm

#### Content promotion box PROFI for angle grinders, 36 pieces

5 x Tapered brush KBZ	Ø 100 mm x M14 x 0,5 mm

## Brushes with twist-knotted wire for the use on angle-grinders

Ideal for aggressive applications under most adverse conditions, e.g. removing wall paint from very rough-surfaced natural stone. They are characterised by a high removal rate and extreme stability.

### RBZ

Wheel brush with twist-knotted wire, aggressive version for extreme applications.

PRODUCT	Ø x BORE SIZE MM	SPEED R.P.M.	SHAPE	CONTENT PIECES	ITEM CODE	BAR CODE 4081600
Steel 0,5	115 x 22,23	12500	wheel	1	6422100	642179

## ▼ Brushes with crimped wire for the use on bench grinders

RBW						
		<p>Wheel brush with crimped wire for heavy brushing operations. Long service life. Supplied with reducing bushes.</p>				
PRODUCT	Ø x BORE MM	SPEED R.P.M.	SHAPE	CONTENT PIECES	ITEM CODE	BAR CODE 4081600
Steel 0,3	150 x 30	6600	wheel	1	6425020	642162

## ▼ Brushes with crimped wire for the use on angle-grinders

These brushes behave less aggressively and are therefore predestined for finer applications where care must be taken to prevent a removal rate too high, e.g. removal of rust from stair railings. They are characterised by a long service life and high stability.

TBW						
		<p>Cup brush with crimped wire. Less aggressive characteristics than the twist-knotted version. Width of 80mm and 100mm with a removable support ring.</p>

Steel 0,3	100 x 6	4500	Wheel	10	6426221	642223

## Special brushes for the use on drilling machines

### RBS 6

Safety wheel brush, inspected by the German MOT. The wire is embedded in a plastic disc which leads into the fact that they can only break at predetermined breaking points. The exactly defined working area means a long service life and permits precious operations as the brush cannot fan out.

PRODUCT	Ø x BORE MM	SPEED R.P.M.	SHAPE	CONTENT PIECES	ITEM CODE	BAR CODE 4081600
Steel 0,3	65 x 6	15000	Wheel	10	6426420	662122

## Hand brushes

### HAND BRUSHES WITH FLAT OR CRIMPED WIRE

Brush-body made from high class beechwood with round edges and 10 mm hole for self hanging. General purpose for soft rust-removal and other cleaning applications. Brushes with stainless steel wire are non-magnetic.

depainting, derusting, cleaning
